

TFIM brings to you: Westinghouse Engineering Days - “Careers in Engineering”

Speaker: Paul Salopek

Paul Salopek (Steel Valley '78) offered to come out to Steel Valley and speak to our students about “Careers in Engineering” in the HS auditorium. Paul is a Product Manager for Westinghouse and is often part of the team that comes out to local high schools to talk about Engineering and do hands on activities. He really wanted to “give back” to Steel Valley and we think that is great!

This event will take place on May 5th, period 7. We are looking to target **Juniors and Seniors** in higher level Math and Sciences, as well as any student who has shown a strong interest in Engineering!
